

# Bourne Stormers Model Club

ISSUE 142

JULY 2021

With the Country continuing to come back to life, model shows are starting to go ahead again. Wings'n'Wheels successfully took place last month and a few of our Club members went along. The Upcoming Events list is finally showing some events to attend, the next one being the Midlands Area Fly-In at Buckminster. I believe there's also some minor sporting event happening on the same day but, after much searching around, I found that it doesn't start until 8pm so it won't clash with the (obviously more important) Fly-In.

In the category of 'Even More Important News', next month's Club meeting will return to the Wishing Well pub in Dyke, subject to the current 'Unlock Date' of 19th July remaining the same. Field maintenance is ongoing as usual. If any other Club members would like to help, Thursday morning is a regular grass cutting time. The Club Facebook page is the general contact point for those interested. Next week, on Thursday 15th at 2pm, the remainder of the Field will be getting a weed killer spray (weather permitting), additional helpers always welcome.

With no particular theme, here's a couple of photos taken at the Field recently.

Simon Roberts recently joined the Club and has a number of Electric Ducted Fan models, this is his Mig 15 on a low pass.

In addition to Club members, June's Fun Fly event was watched by a local swan from the far side of the Field .

This month's Spotlight Model comes courtesy of Derek Bailey. Called a Valkyrie, it's an aerobatic trainer that Derek built from a plan donated by Malcolm. The maiden flight was (mostly) successfully carried out early last month and now it's trimmed out, it has shown itself to be a nice, stable model.

### Midlands Area Fly-In at Buckminster on Sunday 11th July

Final reminder for this event on Sunday. Gareth has sent out an e-mail with details and a request to let him know if you are intending to go. One thing we're unsure of is the availability of refreshments. It will probably be worth taking your own lunch. Currently the weather is looking good; warm, light breeze and a bit cloudy.

Malcolm's 3D printed aerobat had a little bump. At least spare parts are easy to get.

Finally, next month's Newsletter may be a little early, or quite late. I'm at the RAFMAA Champs on Club meeting night, after which I'll be preparing for my daughter's wedding on the Saturday.

### Upcoming Events
