

Bourne Stormers Model Club

ISSUE 180

SEPTEMBER 2024

Quite a lot has been going on since last month. Down the Field you will notice some new starting tables made from plastic pallets and crates, with wooden tops. These are pretty much rot proof and, if damaged will probably only need a few Ty-wraps to fix them. A big Thank You to Steve White, Malcolm and Mark for gathering the parts and building them, mostly on a single Thursday morning.

This month's meeting asked and answered a couple of questions with regards to upcoming events. Firstly, the Club Build suggested last month has been decided on and a date has been set. The model is a Flite Test 'Bloody Wonder Mk111' and the event (possibly RC combat) will join the October FunFly on Sunday 20th October. All the required details are available on the Club Facebook page along with a link for the plans. Failing that, here's the basics: Made from 5mm foamboard (available from Hobbycraft, 4 x A1 sheets for £12). The motor is a 2836 1120Kv 270W unit (Steve has them). If you have problems getting the plans, contact this Newsletter and I'll e-mail a copy out to you.

The other question and answer was about an End of Summer BBQ, a provisional date was set for Sunday 6th October as a Bring Your Own Food Event.

The new starting tables.

This month's Spotlight Model is Jon's new Evolution Fusion. Running on a 3547, 1190Kv motor and a 4S 1500mAh LiPo. Jon has kindly provided a write up for it, so here it is. "This plane in the right hands will give any of our most experienced pilots a run for their money. Unfortunately I shall be flying it so panic over lads. The build went almost to plan but there were some minor alterations to be made by the same person that completed the excellent, fantastic, professional, faultless, brilliant covering job. Thank you Malcolm."

A bit of combat practice between Steve White and Mark.

Mark with a recently acquired Tucano, on approach after a successful flight.

Finally, road works are closing the Bourne end of South Fen Road again. The closures are from 8pm to 6am during this week (about gone now) and for the whole of the weekend (7th/8th September). They're resurfacing from the start of the road to the allotments. One day they may get to the bit that really needs doing !
