

# Bourne Stormers Model Club

ISSUE 139

JUNE 2025

With the start of June, the Summer weather is finally upon us, windy with showers. Hopefully Autumn will start next week and we'll get sunny and light breeze for a few months. Again, our esteemed Cutting Crew have managed to get our mowing equipment working after the tractor decided to elect a new Pope last week (white smoke I believe).

By the time I finish writing this month's Newsletter, a replacement green mower should be winging it's way to the Field because the old one, even with the clutch fixed, is still throwing up problems.

There were a few notes from the Club meeting this month including a reminder that the CAA will soon require everyone to have completed the BMFA RCC test or the CAA Competency test to maintain their Flyer ID. Holding a BMFA 'A' cert, or higher, will no longer be enough.

We've had a little more publicity in the way of an article in the June issue of the Grantham area 'Village Link' magazine. Here's a link to the online version - currently waiting for the June issue: '[granthamlink.co.uk/our-magazines/](http://granthamlink.co.uk/our-magazines/)'. As usual, any other ideas to boost our Club profile are welcome.

Our Summer Meal has now been booked for Saturday 19 July at the Waggon & Horses in Langtoft, sitting down at 7:30pm. For those going, no deposit is required but please pre-order your starters and main courses, with your names, to Derek (or this Newsletter) soonest and definitely before 5th July. Payment on the night will be cash and please remember that Derek doesn't have change. I've (hopefully) sent out a copy of the menu with this Newsletter.

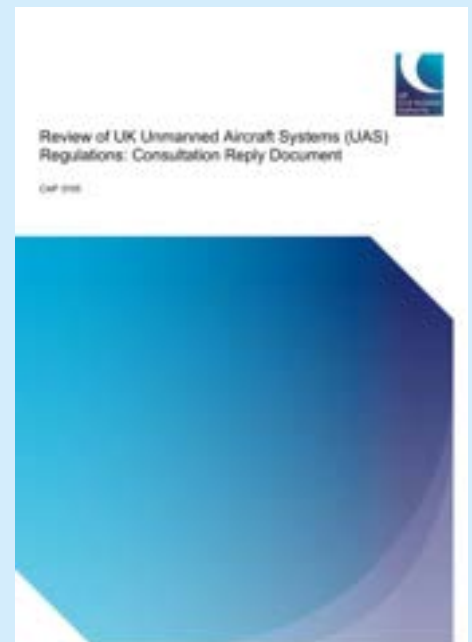

Not all Viggins get away  
easily on launch.

Instead of a Spotlight Model this month, I thought a Club Caption Competition would be fun, so some suitable (and polite-ish) comments and captions for this picture from April please:

This is the Response Document to the last CAA consultation (the one that included the Remote ID proposal). There's a quick summary on the BMFA website. It shouldn't adversely affect flying at a club field, but, if it all goes through and becomes law, people flying models between 100g and 250g that don't currently need an Operator ID are going to be a bit miffed.

Finally, don't forget about the Midland Area Fly-In at Buckminster on Sunday 6th July. It's usually a good day out. Also a little pre-warning of the Melton and District Model Club's 60th Anniversary Model Show on the 2nd and 3rd of August.

## Upcoming Events

### June 2025

**Wed 4th**

Club Meeting - Wishing Well

**Sun 15th**
